

“YOUR EQUIPMENT, OUR SOLUTION”

WHAT IS KULR VIBE?

WE HAVE BEEN PROVIDING CALL-IN SERVICE FOR MORE THAN 20 YEARS TO LARGE FLEET SIZED CUSTOMERS. WE SERVICE COMMERCIAL AIRCRAFT AS WELL AS DoD.

KULR VIBE does not connect to or interact with current onboard equipment, it is stand alone. You provide the data, and we immediately provide a less intrusive adjustment solution with typical results under 0.0X IPS seen. Let the KULR VIBE team enhance your track and balance operations.

CALL-IN

- 24/7/365 AVAILABILITY
- ALL HELICOPTERS, MAKES AND MODELS SUPPORTED
- TESTED IN OPERATIONAL DoD ENVIRONMENTS
- MAIN ROTOR, TAIL ROTOR, DRIVESHAFTS, OIL COOLER FANS

OTHER SERVICES

MECHANICAL FAULTFINDING DIAGNOSTIC

1

Our MFD isolates vibration signatures for individual components on the main rotor above the swashplate and identifies which failing component is precluding proper balancing.
*Exceptional results on the Bell 412 main rotor system.

VIBRATION TROUBLESHOOTING

2

With a multitude of different aircraft experience and knowledge, and the use of Spectral Analysis, our team can save you time and money addressing a troublesome vibration.

TRAINING

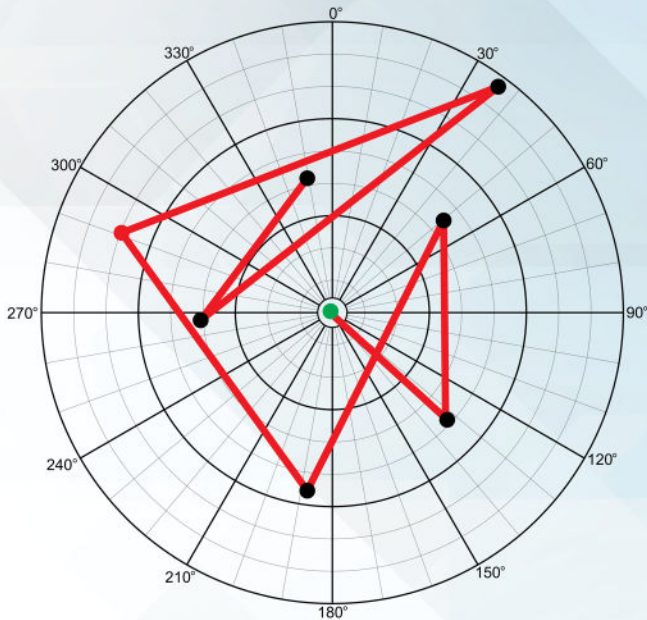

3

KULR offers onsite theoretical and hands-on training that enables the end user to become more proficient in track and balance operations. Training includes vibration troubleshooting, theory, polar chart plotting, real-world scenarios and outside of the box thinking.

Tired of Missing the Mark?

We reduce maintenance costs, improve maintenance efficiency, and reduce downtime significantly

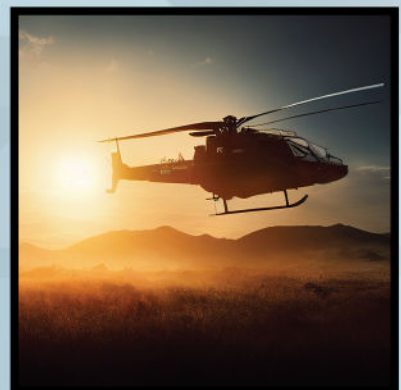

Up To 69% Less Adjustments
Up To 50% Less Runups
Increased Aircraft Availability
